# Egor Tarasov

Software Engineer at Ankr

Abu Dhabi, Abu Dhabi Emirate, United Arab Emirates

## Summary

Developer, seeking out challenges and trying to make an impact.

Also traveler, libertarian, board games lover, movie buff, minimalist.

---

## Experience

### Ankr
Software Engineer
January 2023 - Present (6 months)

Started as a C# developer working on blockchain nodes load balancers. Took
leadership over the product, defined the roadmap, helped shape the global
architecture vision, and actively participated in coding and code review.
Later, as a part of the global company vision was switched to another project
written in go. Helped with introducing few new features, both from development
and architectural perspective

### Securrency
Software Engineer
June 2021 - January 2023 (1 year 8 months)
Abu Dhabi, Abu Dhabi Emirate, United Arab Emirates

Introduced and enhanced a bunch of the system modules. Including research,
prototyping, and development of modules, during the fundamental rewrite
of the core system component to move it to a modular, asynchronous
model. That was done by utilizing NServiceBus Saga and other event-driven
technologies and practices. Provided miscellaneous improvements, including
communicating with external blockchain ledgers

### PickPoint
3 years 2 months

Software Architect
April 2020 - June 2021 (1 year 3 months)

Leading the fight against existing monolith architecture towards micro-services.
At the same time, ensuring things are getting done on time. Leading 2 teams,

both providing them with architectural vision and helping them to follow scrum processes.

Generally speaking, me and my teams are working with services that I started as a developer, but on a bigger scale.

## Software Developer
May 2018 - April 2020 (2 years)
Москва, Москва, Россия

Created and improved a bunch of modules, systems, and core components for the logistician company.

- Introduced event-driven architecture to the system by writing a micro-framework on top of RabbitMQ. (.Net Core)
- Developed integration module with so-called agents (external delivery points owners)
- Developed new modules for customers mobile app back-end (WCF, ASP .NET Core WebApi, MS SQL, Redis)
- Developed a new sending queue micro-framework (Rabbit MQ, .Net Core)
- Developed a bunch of custom integration modules (.Net Core, SOAP (sending to it), etc.)
- Introduced micro-services to the company by creating few self-contained web APIs (mainly ASP .NET Core WebApi, PostgreSql, MongoDb)
- Lead the fight against an excessive amount of stored procedures in the system by both rewriting them to EF Core and replacing them with micro-services

## WSS-Consulting
Software Developer
September 2017 - May 2018 (9 months)
Москва, Москва, Россия

Implemented custom modules in SaaS Document Management System. Provide developed modules with documentation and test cases. The main focus of the modules was on reporting and custom document flow.  Mainly with C# (.Net Framework) and vanilla javascript.

## Среда Обитания
Junior Software Engineer
June 2016 - August 2016 (3 months)
Moscow, Russia

Was involved in developing company website to meet search engine optimization standards

## Education

**Moscow State Institute of Radio Engineering, Electronics and Automation (Technical University)**

Bachelor's degree, Business informatics · (September 2012 - June 2016)
